

The goal of every Motus driver design is linear frequency response, low distortion and superb tonality.

After hundreds of hours of refinement each driver allows for the application of a minimal crossover to achieve your desired target response.

Every Motus driver goes through a rigorous four stage quality control process to ensure that the driver in your loudspeaker represents the best Motus has to offer.

The UH130PW1 is a state of the art underhung mid bass driver. It is equally at home as the woofer in a two way design or the midrange in a multi-way speaker.
